SUMMARY

I am a Full Stack Developer with over 1.5 years of experience in developing scalable web applications using Angular, Node.js, and MongoDB. I have a proven track record of delivering impactful solutions that enhance productivity and performance. My expertise extends to REST API development, AI-driven systems, and optimization techniques. I thrive in collaborative environments and aim to contribute to innovative projects

EXPERIENCE

Associate Full Stack Developer

BornWhiz Technologies

09/2024 - 05/2026 India

- Led a team of 4 developers, coordinating tasks, reviewing code, and ensuring timely delivery of features
- Designed and developed a full-stack educational web platform using Angular, Node.js, and MongoDB
- Built responsive frontend UI and developed backend REST APIs, integrating both layers seamlessly
- Optimized application performance by resolving Angular RxJS memory leaks, improving stability and user experience
- Handled and resolved multiple production issues, ensuring minimal downtime and reliable deployments
- Contributed to development of a Flutter mobile application integrated with backend APIs
- Increased team productivity from ~200 to 400-500 tasks/day (2x)

Frontend Developer Intern

BornWhiz Technologies

09/2024 - 02/2025 India

- Built dynamic and responsive Angular user interfaces using Angular for an educational web platform
- Built reusable Angular components and responsive layouts with CSS and Bootstrap
- Integrated frontend with backend APIs and handled API responses
- Focused on frontend development with hands-on exposure to backend technologies
- Participated in debugging and resolving issues in both development and production environments

EDUCATION

B.Sc. Computer Science

Shree Raghavendra Arts and Science College

01/2021 - 05/2024 Keezhamoongiladi

LANGUAGES

English

Proficient

Tamil

Native

KEY ACHIEVEMENTS

✓ Productivity Improvement

Increased team productivity from ~200 to 400-500 tasks/day (2x) through effective leadership and optimization

SKILLS

GitHub	Node.js	Express.js	
Angular	MongoDB	Python	
React	TypeScript	JavaScript	
REST	JWT	Mongoose	AWS
S3	AWS Lambda	CloudFront	
Git	Postman	Linux	
Google Sheets	GCP	Flutter	
SPA			

PROJECTS

Portfolio Website & Contact API

01/2024 - 02/2024

Personal portfolio showcasing my work and projects

- Built a personal portfolio website with a custom Node.js contact API
- Implemented form validation and automated email notifications using Nodemailer

Google Sheets Dashboard (Angular)

01/2024 - 03/2024

Dashboard for visualizing Google Sheets data

- Integrated Google Sheets data into an Angular application using the Google Sheets API
- Built real-time dashboard with dynamic tables and data visualization

Expense Tracker SPA (React)

06/2024 - 08/2024

Single Page Application for tracking expenses

- Built a client-side expense tracker with local storage persistence
- Implemented real-time balance calculation and categorized transactions
